

## Cisco CBS350-8FP-E-2G Managed Switch - Datasheet

### Full Technical Specifications

Product Name:	Cisco CBS350-8FP-E-2G
Switch Type:	Managed Switch
Total Ethernet Ports:	8 x 10/100/1000 PoE+ Ports
Uplink Ports:	2 x 1G SFP
Switching Capacity:	20 Gbps
Forwarding Rate:	14.88 Mpps
PoE Standard:	IEEE 802.3af/802.3at (PoE/PoE+)
Total PoE Power Budget:	130W
Fanless:	Yes
Layer Support:	Layer 2 and Layer 3
VLAN Support:	Yes (4096 VLAN IDs)
Operating Temperature:	0°C to 50°C
Dimensions:	279 x 170 x 44 mm
Weight:	1.6 kg
Warranty:	Limited Lifetime
Energy Efficient Ethernet:	Yes (802.3az)

### How to Set Up Cisco CBS350-8FP-E-2G Switch

1. Unbox the switch and connect it to a power source.
2. Connect your PC to one of the Ethernet ports.
3. Open a web browser and enter the default IP: 192.168.1.254.
4. Log in using default credentials (username: cisco, password: cisco).
5. Follow the setup wizard to configure VLANs, IP addressing, and security settings.

## **Cisco CBS350-8FP-E-2G Managed Switch - Datasheet**

6. Connect your network devices to the PoE ports.
7. Monitor and manage the switch via Cisco Business Dashboard or Web UI.
