

MikroTik SXTsq 5 ac (RBSXTsqG-5acD) Datasheet

Introduction

The MikroTik SXTsq 5 ac (RBSXTsqG-5acD) is a compact and weatherproof wireless device designed for outdoor point-to-point links and CPE applications. It supports 802.11ac wireless and includes a powerful 16 dBi antenna for long-range performance.

Key Features

- Dual-chain 802.11ac 5GHz wireless
- Integrated 16 dBi directional antenna
- 1x Gigabit Ethernet port
- RouterOS Level 3 license
- Passive PoE support
- Compact and weatherproof design

Technical Specifications

Model: RBSXTsqG-5acD

Wireless Standard: 802.11ac, dual chain

Frequency Range: 5.1 - 5.8 GHz

Antenna Gain: 16 dBi

Max TX Power: Up to 25 dBm

Ethernet Port: 1x Gigabit Ethernet

Processor: QCA9557 @ 720 MHz

RAM: 64 MB

Storage: 16 MB Flash

PoE Input: Passive PoE (10-28 V)

Max Power Consumption: 7W

Operating System: RouterOS Level 3

Dimensions: 129 x 129 x 34 mm

Weight: 295g (with mount)

Operating Temperature: -40°C to +70°C

Mounting: Pole mount, metal ring included
